

Sector Experience

Residential Developments- High rise

Objectives >

- >Meet Building Regulation requirements including safe and efficient means of escape.
- >Minimise overdesign, in particular with regard to stair cores and structural fire protection.

Our Service >

Performance based Fire Engineering

- >Planning of means of escape including emergency exits and exit width.
- >Optimum location of stair cores.
- >Specification of active and passive fire safety systems including detection & alarm, suppression and structural fire protection.

Smoke modelling

- >Assessment of both natural and mechanical strategies provided for common corridors to show achievability of extended travel distances.

Compliance with relevant code & guidance:

- >Where fire engineering is not required a code compliant solution is adopted. The detail needed can be extensive. Our fire strategy conveys all key requirements and specifications.

Fire Strategy Drawings, Fire Legislation Applications and Cons

Projects >

Atlantic Quarter Cork Photo Credit. Foster & Partners Architects. Howard Holdings

MSA have developed the fire strategy for this landmark 28 storey building in Cork. Currently in post planning stage, the building includes a number of fire engineered solutions including a roof garden, an evacuation lift, extended travel distances and a single stair serving a basement car park.
